

MISE EN SITUATION

Electric Fat Trike

The Electric Fat Trike is the perfect companion for your next off-road adventure. The 24" x 4" front wheel rolls over anything in your way, and the rear 20" x 4" wheels lower your center of gravity for stability. The front suspension and suspension seatpost keep you comfortable on rough terrain.

\$2,732.00

- A Large Easy-to-Read LCD
- Wide Wheelbase
- Charge time : 3 hours

Situation :

You work for Super Bike, a shop specialised in all types of electric bikes and tricycles. One of your customers plans to swap his car for a more eco-friendly means of transport. He is hesitating between this electric fat trike and an electric bike.

Prepare your arguments to convince him, focusing on :

- The benefits for the environment and his health
- its stability
- its multiple uses
- its storing capacity ...
