

e- Golf

£27,575

The e-Golf combines style, practicality and comfort.

- LED headlights for less energy
- 16-inch alloy wheels for extra-aerodynamic
- climate control cabin
- adjustable front seats, available in leather
- Android and Apple entertainment apps available on the dashboard
- **45 mins.** That's how long it takes to charge your new e-Golf using a rapid charger.

London to Brighton. And back.

This is how far you can go without recharging your new e-Golf. That's one charge every 5 days for the average driver doing 25 miles a day. (144 miles WLTP tested range.)

Situation:

You work as a sales advisor at Volkswagen and are preparing a meeting with potential customers who are hesitating to buy an electric car. They are worried about the comfort and the autonomy of the car.

Get ready to:

- Make a presentation of the vehicle;
- Explain the different features it offers;
- Reassure your customers and insist on the assets of the vehicle.
